- MANOJ DESAI, MD
- DAVID KNOWLES, MD
- GEORGE NAHASS, MD
- YAGNESH OZA, MD

**FOR PARTNERING WITH US TO
MAKE OUR SCREENINGS A SUCCESS.**

ONE IN FIVE AMERICANS WILL DEVELOP SKIN CANCER IN THE COURSE OF A LIFETIME—IT'S THE MOST COMMON FORM OF CANCER. WE OFFERED FREE SKIN CANCER SCREENINGS TO OUR COMMUNITY LAST SUMMER AT THE CENTER FOR COMPREHENSIVE CANCER CARE. MORE THAN 75 PEOPLE GOT CHECKED!

PROSTATE CANCER IS A LEADING CAUSE OF CANCER DEATH IN MEN, SECOND ONLY TO LUNG CANCER. CAUGHT EARLY, IT IS VERY TREATABLE. OVER 70 MEN WERE SCREENED FOR PROSTATE CANCER AT OUR ANNUAL PROSTATE SCREENING EVENT AT THE CENTER FOR COMPREHENSIVE CANCER CARE.

SMESI VOLUNTEERS HELP REGISTER ATTENDEES AT THE PROSTATE SCREENINGS

BARRY VAUGHN, ULTRASOUND TECH, AND KATIE BLOODWORTH, APN, TAKE VASCULAR SCREENINGS TO A TOWN NEAR YOU!

VASCULAR DISEASE

IT'S A MATTER OF LIFE AND LIMB. VASCULAR DISEASE IS ONE OF THE LEADING CAUSES OF DEATH AND DISABILITY FOR OLDER AMERICANS. WE'VE TAKEN A PAINLESS, NON-INVASIVE, THREE-PART SERIES OF VASCULAR SCREENS ON THE ROAD TO COMMUNITIES IN OUR SERVICE AREA AND MADE THEM AVAILABLE AT A GREATLY REDUCED RATE. EVERY MONTH, 20 INDIVIDUALS ARE CHECKED FOR THIS DISEASE, WHICH IS LINKED TO HEART DISEASE AND STROKE.
